

## Serials Solutions 360 Core release news: monographic content added to Data on Demand reporting tool

**February 13** – We're proud to announce the introduction of monographic content to our Data on Demand reporting tool. This enhancement upgrades your existing ability to generate reports for e-serials, and enables you to generate combined content reports, or a report specific to the content type of your choice. We have also provided additional data points within the reports, reflecting these content types.

All 360 service users can take advantage of this new feature through 360 Core, whether you subscribe to our eBook upgrade or not. You can now view your monographic holdings by generating a report, instead of searching through each database within the Data Management home page. Reports generated for monographic content include the following fields: Type, Title, ISBN10, ISBN13, Publication Date, Resource, URL, and Author.

Simply click on the Data on Demand link from your library's Client Center home page to take advantage of this new functionality.

Home > Data On Demand

**Generate New Data On Demand Report** [Save] [Cancel] [Help]
