

Pre-release pricing available for 360 Counter

Serials Solutions newest e-resource assessment service set for November launch

November 2 – Serials Solutions is excited to announce the November launch of Serials Solutions 360 Counter e-resource assessment service.

360 Counter is the first service that enables you to assess usage in combination with costs so that you can make better decisions. It automates the workload associated with aggregating, manipulating, calculating, reporting and archiving usage data from Project COUNTER reports and your library's e-resource cost data.

360 Counter will place you in the best position to answer critical questions like:

- Which subscriptions should I protect?
- Which journals can be cancelled?
- Which databases provide the best return on investment?

As we approach our launch, we encourage you to take advantage of **special "pre-release" pricing** that is being made available to Serials Solutions subscribers. This special pricing offer is available **now through December 15, 2007**.

To learn more about 360 Counter, please email us at 360@serialssolutions.com or call 866-SERIALS ext. 5. We can email you a 360 Counter brochure and 360 Counter data sheet for you to review, in addition to supplying you with pricing details.

We hope that you'll share in our excitement and take advantage of our special pre-release pricing offer. Remember that this offer only will be available **now through December 15**.
