

WORKING TOGETHER WORKS BETTER

SerialsSolutions

360 Resource Manager Consortium Edition development completed!

Development is complete for our newest service that streamlines e-resource management workflow for libraries that purchase consortia database packages. With release scheduled for December 19th, **360 Resource Manager Consortium Edition** will simplify the management of consortium purchased packages and improve communications between consortia and its members.

Please contact us at 360@serialssolutions.com to receive more details about how you and your consortia can save time, effort and push consortia e-resource subscription metadata to your library's KnowledgeWorks profile.

360 Link Public Notes feature in development

The Public Notes feature now available within 360 Core E-Journal Portal is being developed for 360 Link. The 360 Link Public Notes feature will provide libraries the opportunity to communicate important information about resources - such as availability, authentication and other data - quickly and easily through the 360 Link results page.

We anticipate release will be towards the end of January. Please direct any questions that you may have about this 360 Link feature release to clients@serialssolutions.com.

California Digital Library selects 360 Resource Manager & 360 Counter

California Digital Library (CDL) has chosen Serials Solutions® 360 Resource Manager and 360 Counter to manage and assess the CDL's electronic resources and shared licensing activities. CDL's rigorous evaluation process, including a detailed set of functional and business requirements, determined that a hosted solution would be preferable to a locally managed system for operational and staffing reasons.

After in-house demonstrations and testing, CDL chose 360 Resource Manager and 360 Counter for the following reasons:

- A superior knowledgebase
- Serials Solutions' experience operating a hosted solution
- The ability to operate 360 Resource Manager and 360 Counter in a web-based environment without the need for dedicated client software
- Company commitment to open standards and interoperability
- An agile development process
- Demonstrated vendor responsiveness
- The significantly lower cost of services

Almost 1,000,000 eBooks

The combined effort of our data acquisitions team and client libraries will enable us to track more than 1,000,000 eBooks by year end.

If you have a suggestion for us to track a particular e-resource, please simply email clients@serialssolutions.com and we'll check it out.

Win an eBook reader

You can request information or more details about the eBook service enhancement, and enter to **win a free eBook reader** in our monthly drawing, by visiting www.serialssolutions.com/ebook-reader-drawing.html.

New KnowledgeWorks monthly newsletter

We will soon send out our first installment of our new KnowledgeWorks update.

This monthly communication will include information about the latest additions to KnowledgeWorks and provider changes that are scheduled within the next month.
