STAT!Ref Serials Solutions® KnowledgeWorks Certification Offers Best Access to Users

Jackson, Wyo.–Teton Data Systems (TDS) announces that STAT!Ref is now KnowledgeWorks certified. Through this certification Serials Solutions and STAT!Ref will collaborate to provide the best possible access to e-resources in libraries and institutions. Libraries that subscribe to both Serials Solutions and STAT!Ref may now access their resources directly through Serials Solutions KnowledgeWorks knowledgebase.

“Working with the team at Serials Solutions is easy and efficient,” said Dean Serra, TDS VP of Sales and Marketing. “It also offers another option for our customers to access their STAT!Ref subscriptions getting them to crucial healthcare information quickly.”

“We’re honored to have Teton Data System join the KnowledgeWorks Certification program,” says Sherrard Ewing, Provider Relations Specialist at Serials Solutions. “It’s a sign of their commitment to the positive experience of our mutual clients. Becoming KnowledgeWorks Certified ensures the best experience possible for these clients using Stat!Ref through the Serials Solutions discovery services.”

[KnowledgeWorks Certified](#) is the publisher certification program from [Serials Solutions](#). The KnowledgeWorks Certification program helps Serials Solutions develop the best possible relationships with content providers. These relationships enable Serials Solutions to maintain the highest quality bibliographic metadata for e-resources, eBooks and more in the KnowledgeWorks knowledgebase. Greater collaboration also helps our librarians to more quickly resolve issues if they occur.

The Serials Solutions Knowledgebase embraces the complexity of e-resources. To find a title without a normalized knowledgebase, both the searcher and content provider must use an identical title name, or the search will not return accurate results. Serials Solutions normalizes KnowledgeWorks data to enable accurate results even when variant title names are used. For example, if STAT!Ref uses “ACP PIER, Journal Club & AHFS DI® Essentials™” as the title name and an end user searches for “ACP Physicians’ Information and Education Resource,” he or she will get the right result, whatever the name.

About STAT!Ref & Teton Data Systems (TDS):

[STAT!Ref](#) is the premier healthcare e-source, or a resource electronically delivered. This intuitive subscription e-source enables users to cross search a wealth of healthcare information such as core healthcare reference titles, evidence-based clinical guidance tools, a 3-D interactive human anatomy resource, medical calculators and patient information. Content for the more than 50 healthcare disciplines served including dental, internal medicine, nursing, nutrition, pediatric, surgery and many more comes from a wide variety of authors, publishers and societies. STAT!Ref is a product of Teton Data Systems.

Based in Jackson, Wyo., [Teton Data Systems](#) (TDS) has provided innovative publishing products to the healthcare community since 1990. Founded by family physician Dr. Richard Sugden in order to help healthcare professionals to find information quickly, TDS produces time saving, cross-searchable, electronic healthcare reference products available via CD-ROM, DVD, Internet, corporate intranet and many smartphones.

About Serials Solutions®:

Founded in 2000 by a librarian for librarians, Serials Solutions is the global leader in E-Resource Access and Management Services (ERAMS) that serves more than 2,000 libraries of all sizes and types. Serials Solutions® KnowledgeWorks, the authoritative e-resource knowledgebase, is the foundation for Serials Solutions® 360, the only complete and integrated e-resource access and management solution.
