# The World's Leading Solution for Federated Search

# WEBFEAT<sup>®</sup>

FEDERATED SEARCH SERVICE

SerialsSolutions<sup>®</sup>

# WEBFEAT®

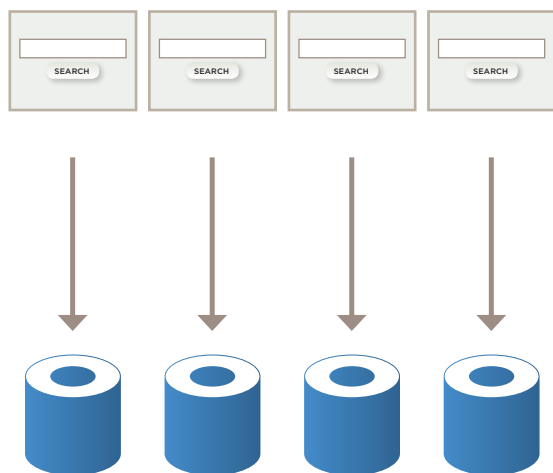

## FEDERATED SEARCH SERVICE

In 1998, WebFeat set out to change the way people accomplish research. The idea is simple. Help libraries search all of their resource databases at the same time by federating them under a single search engine. Today, WebFeat is the world leader in federated search and defines the industry standard of performance, serving more than 16,500 libraries worldwide.

### WebFeat Federated Search Solutions...

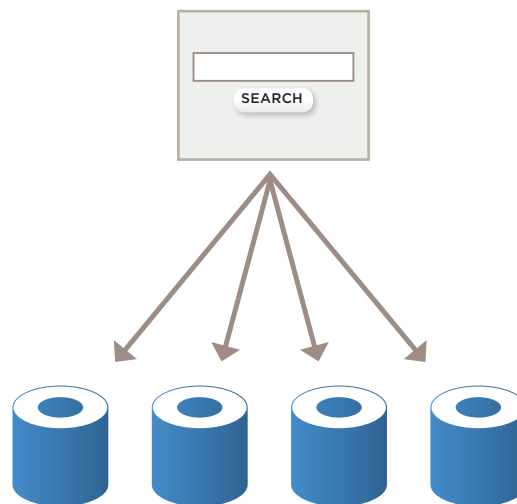

- Execute 150 million+ database searches annually
- Support 9,000+ databases
- Offer unparalleled customizability
- Provide unmatched search and retrieval features

#### THE OLD SEARCH MODEL

Without a federated search service, each database requires its own unique search tool - significantly complicating and slowing the search process for patrons.

#### THE FEDERATED SEARCH MODEL

Using federated search, a single tool searches and accesses all databases with one easy-to-use interface.

#### ✓ GET UP AND RUNNING QUICKLY

WebFeat hosted solutions require no investment in costly hardware or maintenance and can be configured in a fraction of the time of other federated search engines. The heart of WebFeat is its remarkable WebFeat Administration Console, a breakthrough in federated search technology that dramatically reduces the time and staff resource required to configure and maintain a federated search system.

The WebFeat Administration Console enables easy administration and control over every aspect of the WebFeat system, including building database menus, creating subject categories, configuring patron authentication, integrating catalogs and even customizing interfaces. It couldn't get any easier!

#### ✓ COMPREHENSIVE KNOWLEDGE

WebFeat has more experience in the field of federated searching than all other vendors combined. We support more than 9,000 databases in more than 16,500 libraries worldwide - from small schools to the largest public and academic libraries in the world. WebFeat uses its own patented federated search technology which makes it compatible with virtually any database - whether it is standards or API compliant.

#### ✓ WORKS WITH OTHER SERVICES

WebFeat can be integrated with Serials Solutions® 360 Link, AquaBrowser Library, EBSCO A-to-Z, and more. You also can use the WebFeat API to create your own custom WebFeat applications.

## WEBFEAT® EXPRESS

- ✓ Powerful
- ✓ Easy
- ✓ Affordable

The most popular and powerful federated search engine is also the easiest to configure and administer. With unparalleled features and priced at \$8,750 annually for up to 50 resources, WebFeat Express is also the most affordable solution for any library. WebFeat Express includes the WebFeat Administration Console with Menu Manager™, WebFeat Custom API, and built-in authentication features.

### WebFeat Administration Console

The WebFeat Administration Console automates most federated search engine configuration functions and enables you to easily configure and customize every aspect of your federated system. It dramatically cuts the time and cost associated with building and maintaining federated search engines.

You can easily build and administer your library's e-resources portal with the console's Menu Manager™ wizard, which guides administrators through the process of adding, deleting and editing database links and descriptions, creating and populating subject categories and sub-categories, and setting up access privileges. WebFeat simplifies database configuration and remote patron authentication.

### Unlimited Customization Options

With the WebFeat Administration Console you can easily customize portal look and feel for seamless integration with existing library web pages. WebFeat quick search boxes can be embedded in any library web page - including subject pages and research guides. Or, build your own WebFeat applications using the WebFeat API.

## ADDITIONAL SERVICES

### WebFeat Proxy

Now your patrons can enjoy single sign-on authentication for all subscription e-resources with nothing to install or configure. Remote users simply log in once to access the resources available to your library and are never re-prompted for authentication.

### SMART™ Usage Tracker

With just a few mouse clicks you'll get a wealth of reports about database usage at your library, including search and full-text requests by resource, aggregate usage, search terms, turnaways, native response time, remote versus in-house usage, and downstream activity reports for journal names, authors, ISSN numbers, and more. Web-based table and graphical reports easily export to Excel.

## WEBFEAT® ENTERPRISE

- ✓ Multiple Libraries
- ✓ Individual Profiles
- ✓ Single Sign-on

Designed for multi-library networks, WebFeat Enterprise offers the most sophisticated profiling and authentication functionality available. WebFeat Enterprise meets all of the unique needs of complex multi-library systems including the challenges of authentication, profiling, and usage tracking.

Using WebFeat's Enterprise Administration Manager, network administrators can easily build and manage multiple library profiles with distinct database menus, subject categories, catalog views, authentication, and customized user interfaces. WebFeat Enterprise is perfect for consortia, state libraries, large multi-branch library systems, and academic institutions needing multiple profiles. You can easily set up and administer dozens, even hundreds of discreet library or branch profiles, with the ability to import global configuration information from the parent system.

## TRY WEBFEAT EXPRESS

Your WebFeat Express trial enables you to test WebFeat using your library's own databases, catalog, and remote user authentication. You can even integrate your favorite OpenURL link resolver.

Find out for yourself how easy it is to get started. You will be able to build your own WebFeat system in minutes using the remarkable WebFeat Administrative Console with Menu Manager™.

You can even customize your system to match the look and feel of your library's website, including your links and HTML.

Try WebFeat and the WebFeat Administrative Console free for 30 days. If you like what you see, WebFeat is just \$8,750 a year for up to 50 databases. Additional resources may be added for \$85 each. And you can add our SMART Usage Tracker for just \$2,250.

## WEBFEAT EXPRESS FEATURES

- **Compatibility**  
Supports over 9,000 databases
- **No-hassle set up and maintenance**  
Quickly and easily configure your WebFeat system using the next-generation WebFeat Administrative Console (WAC)
- **True native results**  
Present full-text results within their native interfaces; all native functions are fully functional, enabling the user to email, print, or refine searches from within the native interface
- **No technology dependencies**  
WebFeat uses its own patented federated search technology and does not license from third parties
- **Customization and Branding**  
Interfaces may be customized and branded to match your library's look and feel
- **Quick Search boxes**  
WebFeat's built-in "Quick Search" code generator enables libraries to create WebFeat search boxes in seconds that may be embedded within any library web page
- **International language support**  
WebFeat Express supports the ten most widely used languages, plus Unicode and double-byte characters
- **Topic Clustering/Dynamic results display**  
A variety of on-the-fly merge & sort options are available, including topical clustering, date, title, and relevancy
- **Spell Check and Thesauri**  
Includes spell check with specialty dictionaries and your choice of built in thesauri to provide multiple search refinement options
- **Export to RefWorks®, ProCite®, and EndNote®**  
Patrons can save WebFeat results in a variety of formats, even export to bibliographic management packages like ProCite, EndNote and RefWorks
- **SMART™ Usage Tracker (optional)**  
Track and report usage for all databases searched through WebFeat Express
- **EBSCO A-to-Z® integration**  
You can instantly import configuration information from EBSCO's A-to-Z® Service directly into the WebFeat Administrative Console (WAC)
- **OpenURL support**  
Major OpenURL link resolvers including Serials Solutions® 360 Link are supported; OpenURL links can be embedded within WebFeat results citations, enabling users to connect to full-text articles with a single click
- **AquaBrowser® integration**  
Combine the power of WebFeat with the popular AquaBrowser unified discovery interface for next-generation search and discovery of all resources
- **WebFeat Proxy**  
Provide your patrons with one-stop remote user authentication
