Library Managed Holdings Feature

Empowering libraries to track and control locally managed titles using Serials Solutions 360 services

The Library Managed Holdings feature increases control of local databases and associated holdings for all clients of Serials Solutions 360 services. This feature enables you to manage locally held titles through the Client Center in Serials Solutions 360 Core.

Locally managed titles appear in the 360 Core E-Journal Portal. You also can search locally managed titles in the E-Catalog, connect to them using 360 Link, find them using 360 Search, and track them using 360 Resource Manager.

Benefits

New functionality enables librarians to . . .

- Track anything with a title
- Create unlimited local holdings databases
- Add and delete individual titles in local holdings databases
- Edit local holdings data at any time, including dates, titles, etc.
- Upload and download local holdings databases using .CSV and tab-delimited text files
- Eliminate the need to rely on Serials Solutions Library Support team to load this data
