360 Search

Expanded Connector Library

The combined connector libraries of 360 Search and WebFeat now offer more than 5000 resources

The recent acquisition of WebFeat by ProQuest will enable Serials Solutions to make a great leap forward in federated search. Now that the leading two federated search services are working together rather than competing, their power can be combined into one — accelerating the development of new ideas and creating greater value for researchers.

The merger of the two services will take some time, but the acquisition already is providing *immediate* value for users of 360 Search. The Expanded Connector Library now provides access to the combined libraries of both 360 Search and WebFeat- **more than 5000 resources**.

Connections to resources are the lifeblood of federated search. 360 Search now offers the industry's most complete, stable, and accurate library of connectors. Serials Solutions is committed to working with resource providers to develop and maintain our library of connectors to the electronic resources that are most important to your library, including OPACs and Institutional Repositories. Using 360 Search, you can confidently enable your patrons to search all of the electronic resources that your library offers.
